Professional Summary

I have more than 2 years of hands-on IT support experience in a small office. My main work included supporting Windows users, fixing hardware and software problems, solving connection issues, and helping with daily technical tasks. I also built and upgraded over 30 PCs and have basic experience with Ubuntu servers, SSH, Apache, and MySQL.

Core Skills

- L1/L2 IT Support: Helpdesk support, Operating System troubleshooting, application troubleshooting, incident handling, and communications with relevant parties.
- Windows Administration: Installation, configuration of Windows 7, 10, and 11, driver management, updates, and troubleshooting.
- Microsoft 365 / Active Directory: Experienced in using the Microsoft 365 package of applications; knowledge of Active Directory in relation to users/accounts and permissions.
- Computer hardware and networking: Computer build-outs and upgrades, including more than 30 systems, peripherals, network basics, and Wi-Fi networking and router configuration.
- Linux and remote tools: Linux fundamentals, SSH, WinSCP, Virtual Box, and maintenance of virtual private servers.

Work Experience

KiliaService — IT Support Technician / Junior System Administration Intern (Contract)
Nov 2023 – March 2026

- Offered immediate help at Levels 1 & 2 for Windows PC problems that include operating system installations, setting up drivers, installing and configuring software, and troubleshooting.
- Identified faulty hardware, fixed or adjusted faulty hardware, and made sure the system became fully functional.

- Assembled, upgraded, and set up more than 30 PCs, which include assembling the PCs, installing Windows, configuring peripherals, and checking the computer.
- Aided in solving problems related to networks, such as Wi-Fi problems, configuring routers, and configuring devices.
- Created documentation for recurring problems and solutions to facilitate problem-solving.

Projects (Selected)

JKT (JapanKumiTatte) - Personal Website (Ubuntu VPS)

- Deployed and maintained a personal website on Ubuntu VPS using Apache and MySQL; managed the server remotely through SSH and WinSCP.

Self-Hosted VPN & Telegram Web App (Ubuntu VPS)

- Deployed a self-hosted VPN server and Telegram web app; handled updates, configuration changes, and routine Linux maintenance.

Education

Cherepovets Vocational Technical College (CHLMT)

Specialist Diploma in IT / Information Systems and Programming

September 2022 - June 2026

- Relevant Course Work: Basics of SQL Server; Basics of networking (TCP/IP, IP address, routing/switching); Information Systems design.

Languages

- Russian: Native
- English: B2 (Upper-Intermediate)
- Japanese: JLPT N2

Additional

- Employment Authorization: Requires visa sponsorship.
- Availability: Can start remote work immediately; available for onsite relocation from late June 2026.
