## Professional Summary

I have more than 2 years of hands-on IT support experience in a small office. My work has included supporting Windows users, resolving hardware, software, and connectivity issues, and handling daily technical support tasks. I have also built and upgraded 50+ PCs and have basic experience with Ubuntu servers, SSH, Apache, and MySQL.

## Core Skills

- **L1/L2 IT Support:** Helpdesk support, operating system troubleshooting, application troubleshooting, incident handling, and clear communication with users and relevant parties.
- **Windows Administration:** Installation, configuration of Windows 7, 10, and 11, driver management, updates, and troubleshooting.
- **Microsoft 365 / Active Directory:** Experienced in using the Microsoft 365 package of applications; knowledge of Active Directory in relation to users/accounts and permissions.
- **Computer hardware and networking:** PC builds and upgrades across 50+ systems, peripheral setup, network basics, Wi-Fi troubleshooting, and router configuration.
- **Linux and remote tools:** Linux fundamentals, SSH, WinSCP, VirtualBox, and maintenance of virtual private servers.

## Work Experience

### KiliaService - IT Support Technician / Junior System Administration Intern (Contract)

Nov 2023 - March 2026

- Provided L1/L2 support for Windows PC issues, including operating system installation, driver setup, software installation and configuration, and troubleshooting.
- Diagnosed faulty hardware, repaired or replaced components, and restored systems to working condition.
- Assembled, upgraded, and prepared 50+ PCs, including Windows installation, peripheral configuration, and functional checks.
- Helped resolve network-related issues, including Wi-Fi problems, router configuration, and device connectivity.
- Created documentation for recurring problems and solutions to facilitate problem-solving.

## **Projects (Selected)**

### **JKT (JapanKumiTatte) - Personal Website (Ubuntu VPS)**

- Deployed and maintained a personal website on Ubuntu VPS using Apache and MySQL; managed the server remotely through SSH and WinSCP.

### **Self-Hosted VPN & Telegram Web App (Ubuntu VPS)**

- Deployed a self-hosted VPN server and Telegram web app; handled updates, configuration changes, and routine Linux maintenance.

## **Education**

### **Cherepovets Vocational Technical College (CHLMT)**

Specialist Diploma in IT / Information Systems and Programming

September 2022 - June 2026

- Relevant Course Work: Basics of SQL Server; Basics of networking (TCP/IP, IP address, routing/switching); Information Systems design.

## **Languages**

- Russian: Native
- English: B2 (Upper-Intermediate)
- Japanese: JLPT N2

## **Additional**

- Employment Authorization: Requires visa sponsorship for on-site roles.
- Availability: Can start remote work immediately; available for on-site relocation from late June 2026.
